

Colecție de 3 000 de rapoarte oficiale cu efectele adverse mortale ale v@ccinurilor covid

30 ianuarie 2023

Jurnalista independentă Iosefina Pascal a făcut o colecție de aproape 3000 DE STUDII MEDICALE serioase care documentează EFECTELE ADVERSE ale vaccinurilor experimentale COVID-19.

Din cauza limitei de caractere de pe FB, astăzi vă pun la dispoziție 403 studii pe probleme ce țin de coagularea sângelui (TROMBOZE, AVC, hemoragii) și 50 de studii privind DECESELE cauzate de înțepare. Zilele următoare o să pun restul studiilor, a mai scris Iosefina în postarea sa.

Vom reveni cu actualizări, când vor fi publicate următoarele studii.

Studii medicale despre legătura dintre înțepare și decese:
